PROFILE

I like modern technologies, clean code, and interesting tasks.

In my work, I try to provide the best quality within the existing deadlines.

EMPLOYMENT HISTORY

Intern Java Developer, Bionic University
Kiev
2017 — 2018

- In this educational project, I developed the back end of the informational site for parents, which collected information on various services, products, and activities for children.

Java Developer, Raiffeisen Bank
Kiev
2018 — Present

- Increased the flexibility of the system by developing a modern REST API that allows the calling of the banking system engine using Spring Boot and JNA technologies.
- Accelerated migration to the cloud by porting several services from legacy build systems to Maven.
- Developed a set of modern services using Spring Boot, Docker, Kafka, JUnit5, Mockito.
- Accelerated the work of teams, helping to set up configuration parameters and bring services to a new platform.
